Introducing the Winderen Collection: Where Timeless Beauty Meets Modern Innovation

Beautiful Floors Better Future

Introducing the Winderen Collection by Floor Gallery: a refined showcase of conventional plywood, responsibly sourced hardwoods, available in the following finishes: Natural Oil, Hardwax Oil, Lacquer, Nano Technology lacquer (Achieves PTV36+ and has higher wearing capabilities than traditional lacquer).

Our commitment to sustainability is highlighted by FSC certification, ensuring our wood products come from responsibly managed forests that support environmental, social, and economic well-being. We invite you to join us in promoting a sustainable world with the Winderen Collection.

lacquer Finish

This elegant collection offers a wide range of colours and sizes, blending classic beauty with modern performance. Ideal for both domestic and commercial settings, the Winderen Collection merges timeless aesthetics with contemporary functionality.

STRUCTURE

This collection features three formats – Plank, Herringbone, Chevron. Three grades, over 200 colours, numerous widths and thicknesses.
Available in Oak, Walnut, Ash, Maple and several other timbers.

The Winderen Collection by Floor Gallery features predominantly oak, finished with one of the following quality finishes, nanotechnology lacquer, lacquer, natural oil, and hard-wax oil. It has a plywood core with a European oak surface.

The Winderen Collection offers superior quality with 100% natural origins, blending timeless aesthetics and contemporary functionality.

It comes with a 25-year warranty. Winderen plank flooring can be fully bonded or floated, making it suitable for underfloor heating as well as domestic and commercial installations.

The flooring is FSC-certified and meets standards for fire behaviour (EN 13 501/Cfl-s1), formaldehyde emissions (EN 717-1/E1), and noise reduction (DIN EN ISO 10140-3).

By sourcing oak directly from Europe and drying the raw materials at our mill in Hungary before shipping to Portugal, we ensure that our flooring is FSC-certified when required. Our lamellas, crafted in Portugal, are combined with premium European plywood and manufactured using top-tier European machinery, enabling us to uphold the highest quality standards.

We use polyurethane adhesive, rather than PVA, to ensure that our products are suitable for underfloor heating in commercial and residential settings.
This ensures that our floors combine the beauty and benefits of nature with the best innovations of man to create timeless aesthetics and contemporary functionality.

Winderen Collection Engineered Wood

Natural oil and Hardwax oil penetrate the surface of the wood to create a protective, breathable surface, emphasising the grain and texture of the wood. These finishes accentuate the natural beauty of wood and will do so for many years, as long as the maintenance regime is adhered to on a regular basis.

Lacquer finish is a protective layer that can be applied in various gloss levels and forms a protective layer on top of the wood. The maintenance is a simple process of vacuuming and cleaning with a proprietary cleaner.

Nano technology lacquer is an advancement on traditional lacquer, offering a much higher durability and slip resistance, without compromise on the maintenance and appearance.

FLOOR GALLERY

All our floors are manufactured in the same factory on the same production lines and the same finishing line. This ensures that the T&G is the same for all floors, and the colour and finish are consistent, meaning that it is possible to lay all the different formats in the same project without the issue of different heights and T&G.

Add the benefits of Nano Technology lacquer and not only do you have a high-quality product, with industry-leading durability and slip resistance, but the ability to choose almost unlimited colours, a gloss level of your choice and various formats and sizes.

The unparalleled selection means that Floor Gallery can supply a floor that suits any style from traditional to contemporary without compromise.

GRADE

RUSTIC / NATURE / SELECT

Rustic

Rustic allows up to 5 healthy and unhealthy knots per linear meter, with a maximum size of 30mm. It permits filled splits and cracks up to 150mm x 3mm and includes allowances for silver grain/wood rays and mineral streaks up to 150mm in length. Bark pockets and holes/voids are not allowed.

Nature

Nature grade permits up to 3 healthy knots per linear meter (max 15mm) and 2 filled unhealthy knots per linear meter (max 15mm). Holes, voids, splits, cracks, and bark pockets are not allowed. It includes silver grain/wood rays and mineral streaks up to 50mm in length, with no pronounced appearance.

Select

Select grade allows up to 2 healthy knots per linear meter with a maximum size of 3mm. Unhealthy knots, holes, voids, splits, cracks, bark pockets, and mineral streaks are not allowed. It does allow silver grain/wood rays and heartwood.

At the Floor Gallery, our mission statement is very simple:

We aim to provide our clients with the best products we can find.

This is for Appearance, Performance, Value for money, Healthy living and real sustainability, not the buying of carbon credits but products produced by companies with a real conscience.

We are aware that our products are not perfect, but as progress is made in production techniques and raw materials, we are getting closer to our goal.

Winderen Collection in Stores

Floor Gallery presents Oak Nature in Chevron, an unconventional floor with boards cut at a 30° or 45° angle, ensuring an exclusive and stylish interior pattern. This design gives rooms an elegant look while offering all the benefits of wooden floors, including natural beauty, timeless charm, and maximum cosiness.

We also offer plank and Herringbone patterns, with Herringbone featuring a distinctive arrangement of rectangles to suit both domestic and commercial designs.
