CLASSIC CORK COLLECTION

Beautiful Floors, Better Future

NEW WATERPROOF PERFORMANCE

Our Classic Cork Collection is one of the most sustainable options for your project and now features enhanced waterproof performance, achieved through advanced technology in both the surface and the cork core board, making it suitable for demanding environments.

NEW WATERPROOF PERFORMANCE

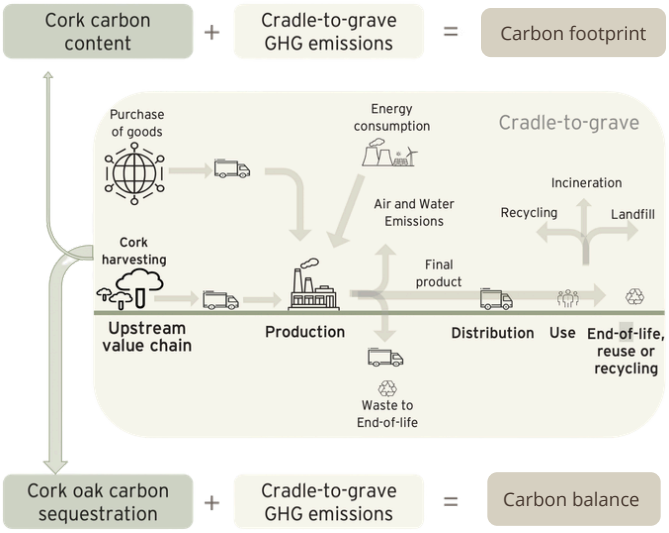

Introducing the NEW Classic Cork Collection: Waterproof Performance with Sustainable Cork Comfort

Floor Gallery proudly introduces the Classic Cork Collection, a 100% PVC-free product line that reflects our commitment to sustainability and eco-conscious design.

This updated collection now features a new waterproof construction, with advanced technology in both the surface and the cork core board, meaning the product itself is waterproof while achieving a Class 33 commercial rating. It also retains the natural acoustic comfort and underfoot softness that cork flooring is known for.

Explore our latest collection: 100% PVC-free, now with new waterproof performance and enhanced by the natural comfort of cork. Additionally, our cork floors are carbon-negative, contributing to a greener and healthier built environment.

Class B Fire Rated As Standard

Our Classic Cork collection achieves a fire class rating of B-fl S1 as standard. This makes it the perfect choice for a wider range of interior environments including offices, hotels, libraries, care homes, and restaurants.

The durable, 100% PVC-free structure supports sustainable project requirements while maintaining reliable performance

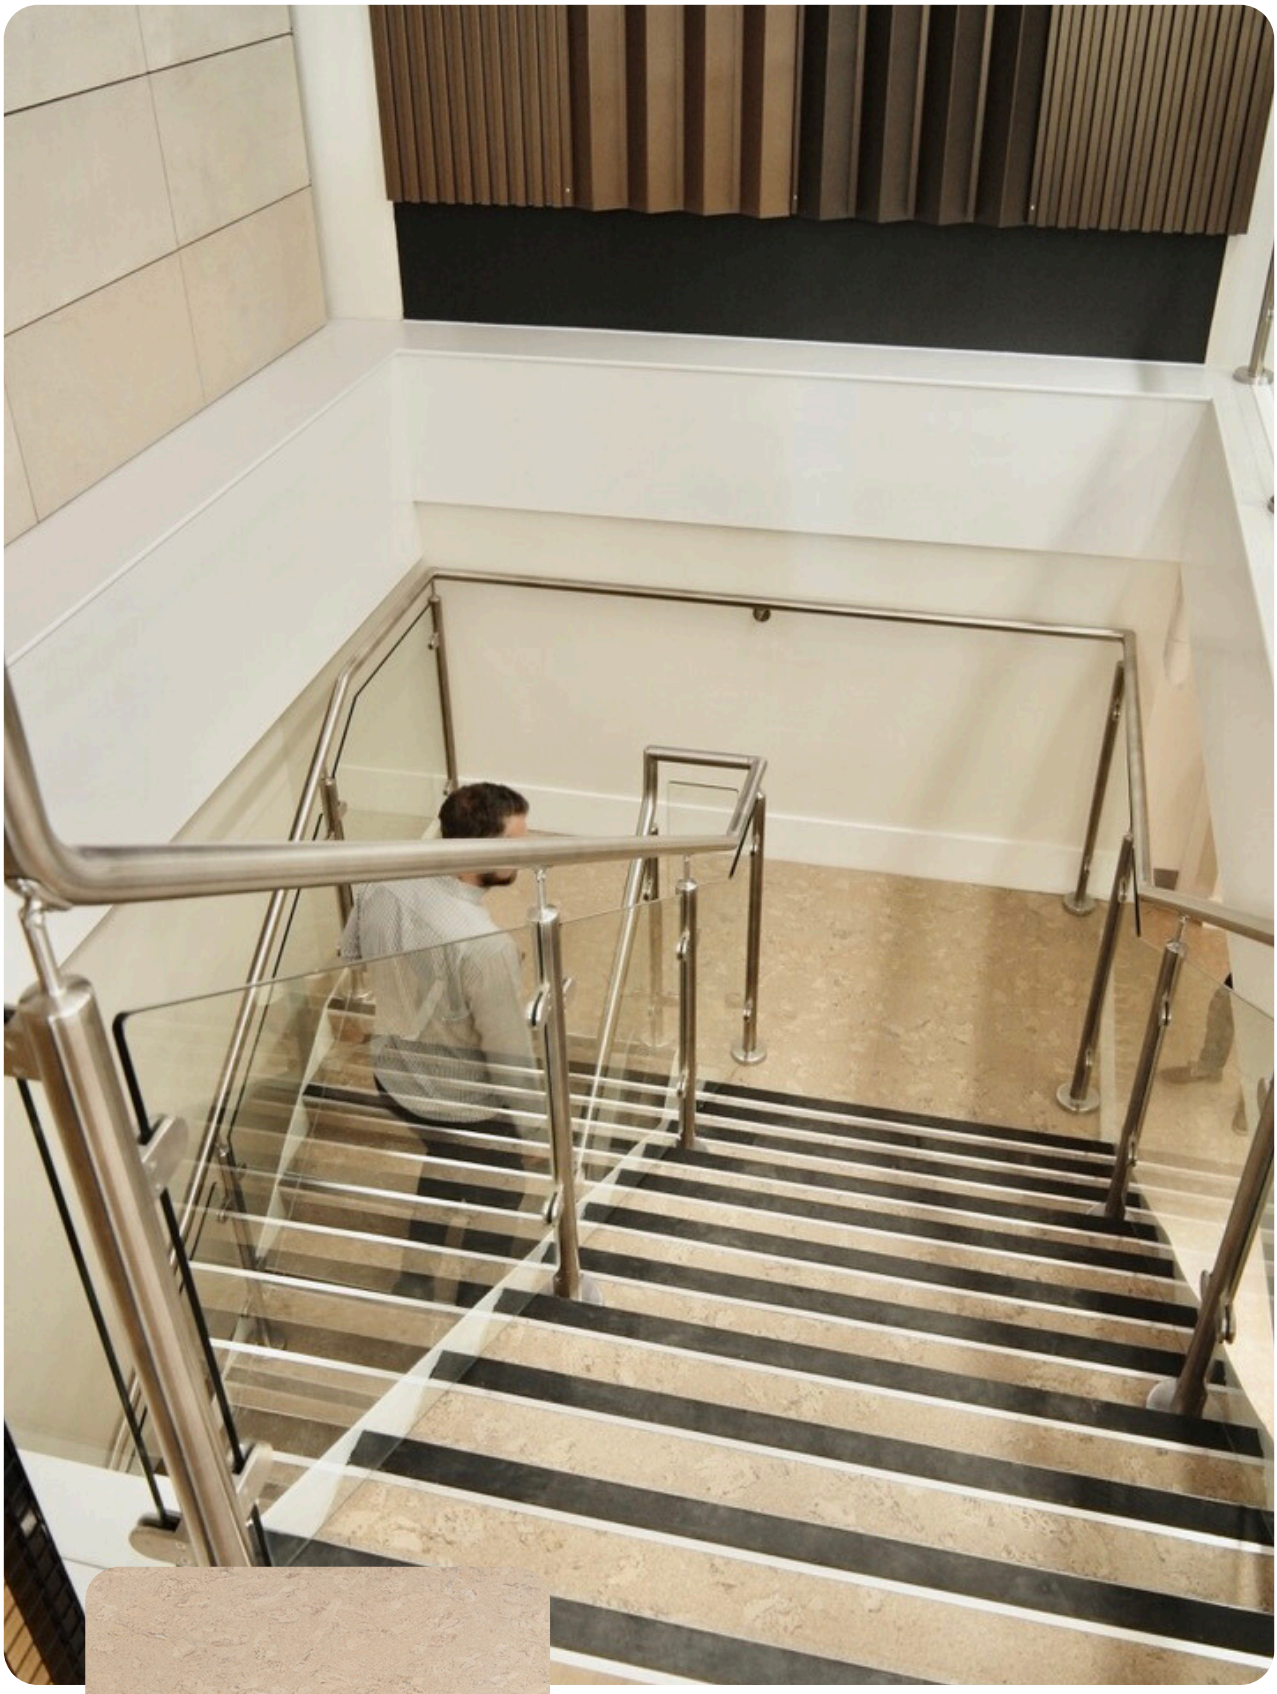

Carbon-Negative:

Cradle-to-gate; Cradle-to-grave

A study by EY, "The Value of Cork Oak Montado Ecosystem Services," follows ISO standards and ILCD guidelines, highlighting that the cradle-to-grave carbon footprint of Floor Gallery's cork flooring is +3.54 kg CO_2eq/m^2. However, due to significant carbon sequestration by cork oak forests, the net carbon balance can reach -101 kg CO_2eq/m^2, with sequestration rates of 73t CO_2/t cork. This makes our cork flooring carbon-negative, underscoring its importance in sustainable forestry practices and its potential contribution to carbon neutrality. While maintaining high-performance durability, including enhanced resistance to moisture.

New waterproof performance is achieved through advanced technology in both the surface layer and the cork core board, ensuring the product itself is waterproof rather than relying on a surface coating.

The highly durable HRT protective surface is micro-scratch resistant, helps prevent colour shading, and provides a warm and comfortable underfoot feel, while being produced with environmentally sustainable materials.

PRODUCT INFORMATION

WITH WATERPROOF PERFORMANCE

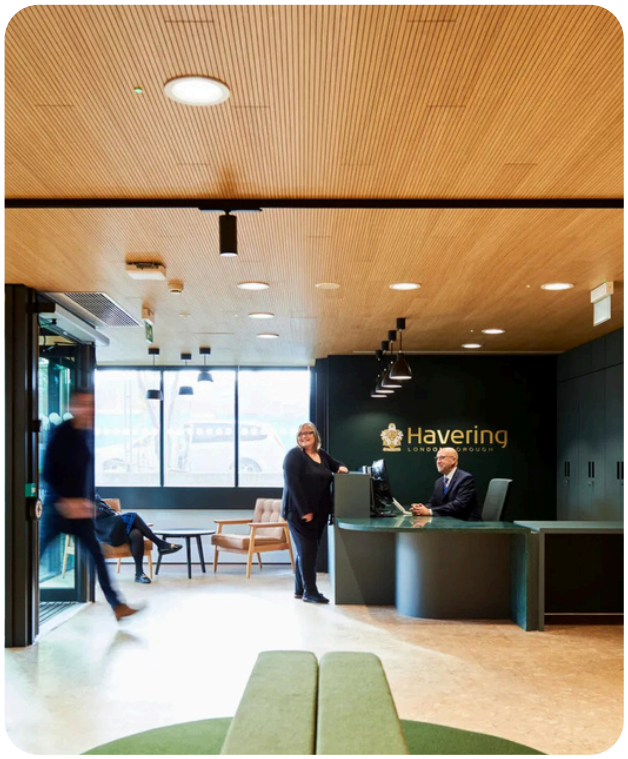

Structure	**Product Type**	Cork
	Surface Finish	PVC Free
	Core Structure	Cork
	Special Construction	PVC Free
	Construction	Engineered
	Specie	European Cork
	Backing	Cork Underlay
Dimensions	**Format**	Plank
	Overall Thickness	7.0 mm
	Plank Dimension	7 x 195 x 1225mm
Data	**Fire Behaviour**	EN 13 501/Bfl-s1
	Formaldehyde Emissions	EN 717-1/ E1
	Footfall Noise Reduction	DIN EN ISO 10140-3 18db
	Warranty	10 Years Residential & Commercial
	Eco Label	Blue Angel
	Sustainable Certificate	BREEAM Certification
Installation	**Installation**	Floating or fully bonded
	System	Click
	Underfloor Heating	Suitable
	Suitability	Domestic & Commercial

"We are Floor Gallery, *and CORK is what we BELIEVE in."*

Beautiful Floors, Better Future

It’s time to change the future, step by step. Let’s collaborate to create a better environment. By working together, we can make a significant impact on sustainability and eco-friendly design.

The cork used in our flooring is harvested without cutting down the tree， only the bark is carefully stripped using traditional methods, allowing the cork oak to regenerate and live for decades.

Our carbon-negative cork floors contribute to a greener, healthier world for generations to come. Join us in this important mission.
