INTRODUCING THE VERMONT
COLLECTION:

**REAL WOOD. ENGINEERED
PERFORMANCE.**

The Vermont Collection
combines the authentic beauty
of real wood with advanced
engineered performance.

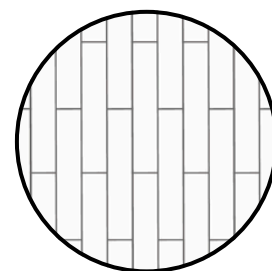

Its reinforced construction
delivers enhanced durability and
resource efficiency, allowing the
floor to perform reliably in both
residential interiors and high-
traffic commercial
environments.

For 2026, the collection
introduces new contemporary
colours, refined textures and
improved installation
technology.

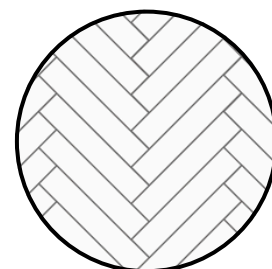

TIMELESS OAK REINVENTED FOR MODERN SPACES

Plank

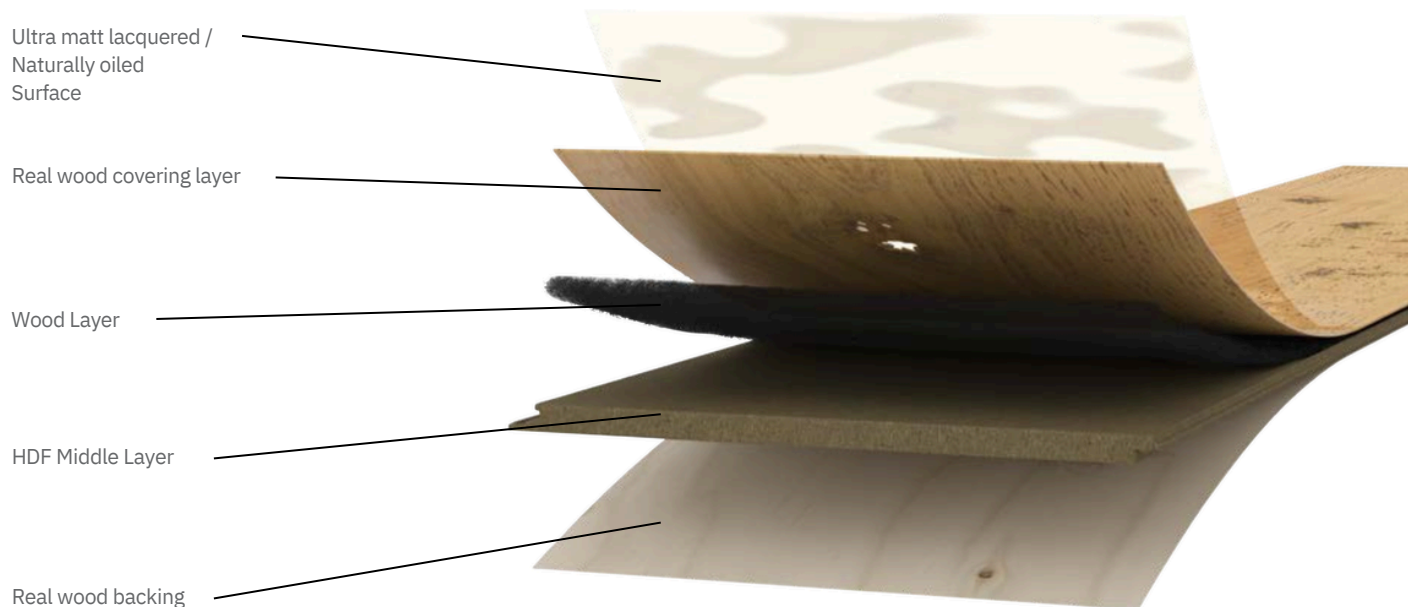

Thickness: 11 mm
 Size: 2200 × 205 mm
 2200 × 270 mm
 2600 × 320 mm

Herringbone

Thickness: 11 mm
 Size: 700x140 mm

Each plank in the Vermont Collection combines natural wood aesthetics with advanced structural engineering. Multiple layers are permanently bonded under pressure to create a highly stable and durable flooring system.

LAYER STRUCTURE

Surface Finish

Natural oil or ultra-matt lacquer finish that protects the wood while preserving its natural appearance.

Real Wood Layer

A genuine wood surface that delivers the warmth, texture and authenticity of natural timber.

Wood Reinforcement Layer

A compressed mixture of wood fibres and mineral components that strengthens the surface and improves resistance to dents and pressure.

High-Density Fibreboard (HDF) Core

Provides exceptional dimensional stability and structural strength.

Wood Stabilising Backing

Balances the construction and enhances long-term durability.

RESOURCE-EFFICIENT CONSTRUCTION

Thanks to its innovative product structure, the Vermont Collection requires approximately one eighth of the timber used in traditional multi-layer parquet flooring. This reduces raw material consumption while maintaining the appearance and performance of real wood

INDENT-RESISTANT

The reinforced real wood surface layer significantly improves resistance to pressure and dents compared with traditional wood flooring, making it ideal for busy households and commercial environments.

UNDERFLOOR HEATING COMPATIBLE

With low thermal resistance, the flooring works efficiently with underfloor heating systems, allowing heat to transfer quickly and evenly into the room.

HARD-WEARING & HYGIENIC

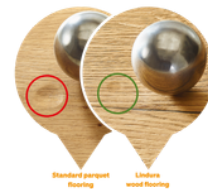

The ultra-matt lacquer finish is highly durable, easy to maintain and resistant to everyday wear, stains and micro-scratches. The surface is also antibacterial, making it suitable for both residential and commercial spaces.

WATER-RESISTANT

AquaStop edge protection technology helps protect planks from moisture, making the flooring suitable for humid environments such as kitchens or utility areas.

SUSTAINABLY SOURCED

All timber used in the Vermont Collection is sourced from PEFC-certified sustainable forestry, supporting responsible forest management and long-term environmental protection.

Sustainable. Practical. Made for Modern Living.

WHAT'S NEW IN 2026

From February 2026, the Vermont Collection introduces a revised flooring range with new design options and improved installation technology.

Key updates include:

- New contemporary colours available across all formats
- Four surface finishes now available in every format, offering greater design flexibility
- **5G Dry® click system for Vermont, enabling faster and easier installation**
- Expanded plank format: 2200 × 205 mm, available in three gradings: Natural, Lively and Authentic

Please note: the new click system is not compatible with existing stock.

STRUCTURE	Product Type	Engineered Wood Flooring
	Surface Finish	Natural Oil / Ultra-Matt Lacquer
	Core Structure	High-Density Fibreboard (HDF)
	Construction	Engineered multi-layer construction
	Specie	European Oak / Ash / Maple / Walnut
	Format	Plank / Herringbone
DIMENSIONS	Overall Thickness	11mm
	Dimensions	Please see details on Format Page 03
	Fire Behaviour	EN 13501-1 / Cfl-s1
DATA	Formaldehyde Emissions	EN 717-1 / E1
	Footfall Noise Reduction	DIN EN ISO 10140
	Warranty	Up to 25 years (Residential) 5 years (Commercial)
	Sustainable Certificate	FSC Certification
INSTALLATION	Installation	Floating or fully bonded
	System	5G Dry® / Unizip®/Angle / tapping system
	Underfloor Heating	Compatible
	Suitability	Residential & Commercial

Please note: the new click system is not compatible with existing stock.
Floor Gallery Limited 2026.

Beautiful Floors, Better Future

The Vermont Collection combines the warmth and character of natural wood with advanced flooring technology.

Its reinforced construction, resource-efficient materials and contemporary finishes create a flooring solution suited to modern interiors, where design, durability and sustainability are equally important.

Suitable for residential, retail and hospitality environments, the Vermont Collection delivers natural beauty with engineered performance.

Developed with a focus on responsible material use and long-term performance, it offers a considered approach to flooring for more sustainable interior design.
