CLASSIC CORK COLLECTION

Beautiful Floors, Better Future

100% PVC-FREE

Our Classic Cork Collection is one of the most sustainable options for your project, combining the natural benefits of cork with advanced surface and core board technology to deliver excellent durability and performance for a wide range of interior environments.

THEFLOORGALLERY.CO.UK

FLOORING BORN FROM NATURE

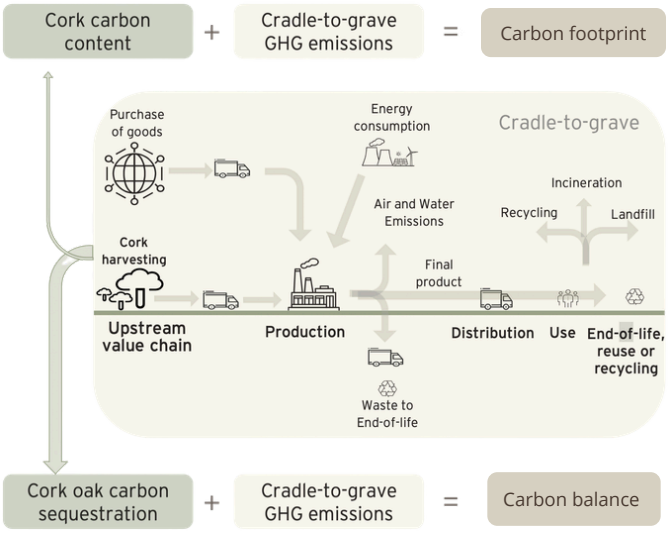

Introducing the Classic Cork Collection: Naturally Beautiful, Water-Resistant and 100% PVC-Free

Floor Gallery proudly presents the Classic Cork Collection, a visually distinctive flooring range made with European cork. Naturally warm and comfortable underfoot, it combines water-resistant performance with a durable Class 33 commercial rating.

Cork is carefully harvested by hand from the bark of mature cork oak trees without cutting them down. The bark naturally regenerates and can be harvested again approximately every nine years.

With its 100% PVC-free construction, natural acoustic comfort and distinctive appearance, the collection is a considered choice for both residential and commercial interiors.

Class B Fire Rated As Standard

Our Classic Cork collection achieves a fire class rating of B-fl S1 as standard. This makes it the perfect choice for a wider range of interior environments including offices, hotels, libraries, care homes, and restaurants.

The durable, 100% PVC-free structure supports sustainable project requirements while maintaining reliable performance

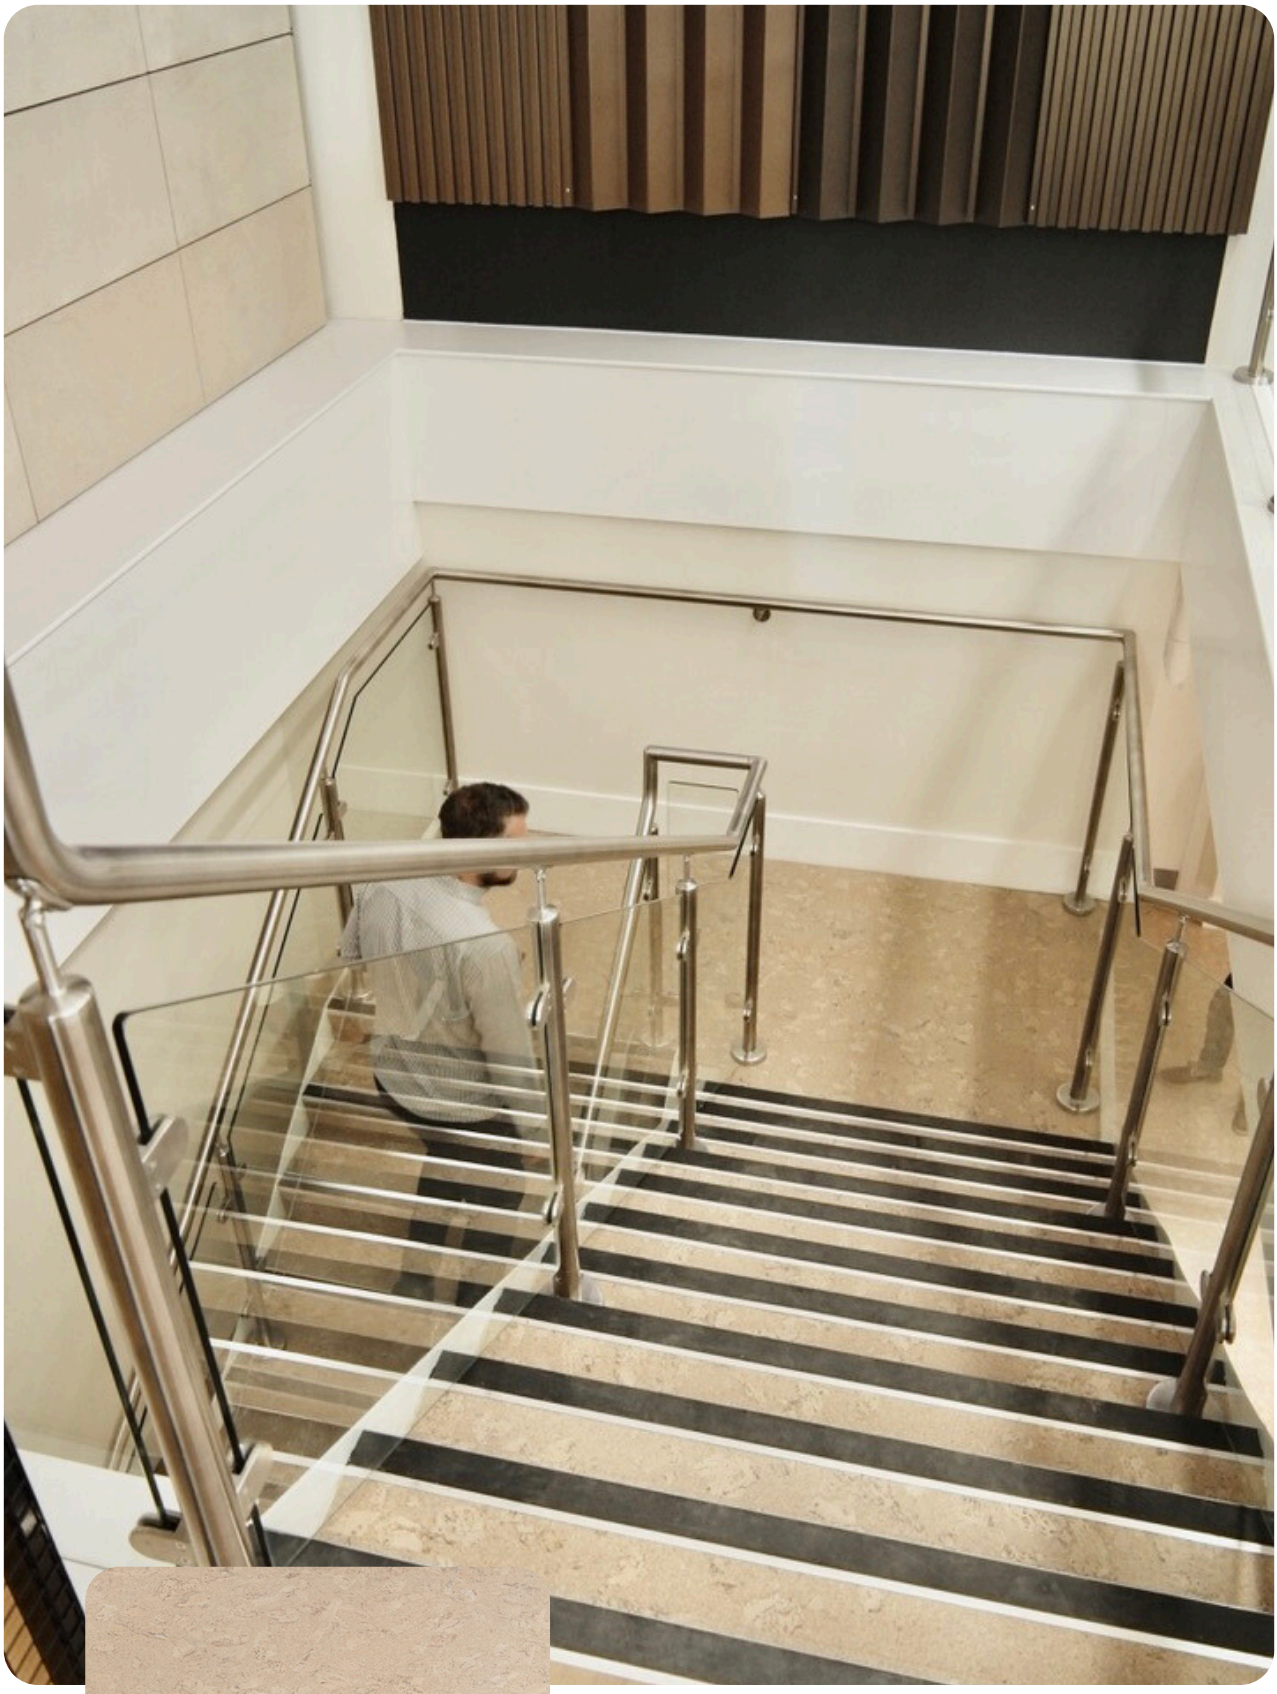

Carbon-Negative:

Cradle-to-gate; Cradle-to-grave

A study by EY, "The Value of Cork Oak Montado Ecosystem Services," follows ISO standards and ILCD guidelines, highlighting that the cradle-to-grave carbon footprint of Floor Gallery's cork flooring is +3.54 kg CO_2eq/m^2. However, due to significant carbon sequestration by cork oak forests, the net carbon balance can reach -101 kg CO_2eq/m^2, with sequestration rates of 73t CO_2/t cork. This makes our cork flooring carbon-negative, underscoring its importance in sustainable forestry practices and its potential contribution to carbon neutrality. While maintaining high-performance durability, including enhanced resistance to moisture.

Water-resistant performance is achieved through advanced technology in both the protective surface and the cork core, helping the flooring withstand everyday spills and moisture.

The highly durable HRT protective surface is micro-scratch resistant, helps reduce colour variation and provides a warm, comfortable underfoot feel, while being produced with environmentally considered materials.

PRODUCT INFORMATION

WITH WATER-RESISTANT PERFORMANCE

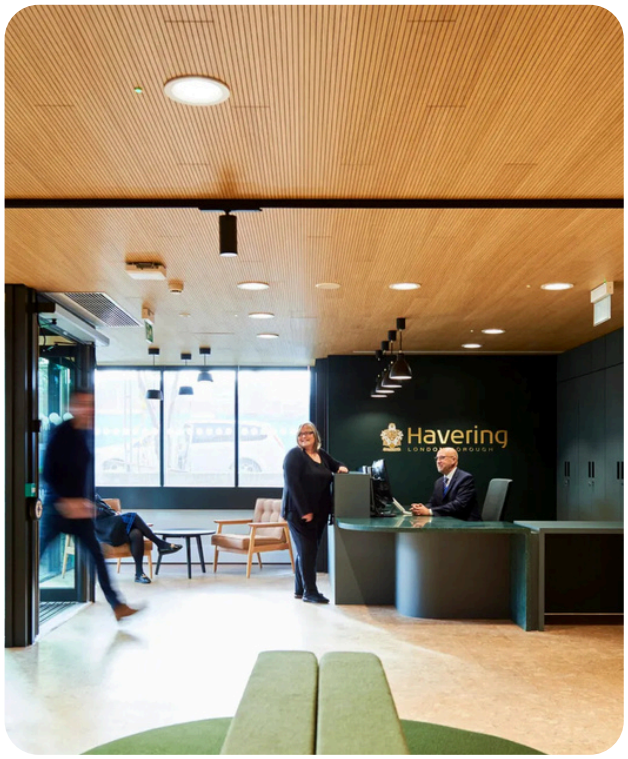

Structure	**Product Type**	Cork
	Surface Finish	PVC Free
	Core Structure	Cork
	Special Construction	PVC Free
	Construction	Engineered
	Specie	European Cork
	Backing	Cork Underlay
Dimensions	**Format**	Plank
	Overall Thickness	7.0 mm
	Plank Dimension	7 x 195 x 1225mm
Data	**Fire Behaviour**	EN 13 501/Bfl-s1
	Formaldehyde Emissions	EN 717-1/ E1
	Footfall Noise Reduction	DIN EN ISO 10140-3 18db
	Warranty	10 Years Residential & Commercial
	Eco Label	Blue Angel
	Sustainable Certificate	BREEAM Certification
Installation	**Installation**	Floating or fully bonded
	System	Click
	Underfloor Heating	Suitable
	Suitability	Domestic & Commercial

Floor Colour:
Traces Natural

Fire Behaviour	EN 13 501/Bfl-s1
Formaldehyde Emissions	EN 717-1/ E1
Footfall Noise Reduction	DIN EN ISO 10140-3 18db
Thickness	7mm
Plank Dimension	7 x 195 x 1225mm

Project: Havering Town Hall
Architect: Hawkins Brown
Product: Original Shell

Floor Colour:
Traces Natural

OUR COLLECTIONS:
Engineered wood, Endgrain, Hybrid engineered wood, Organic vinyl, Cork, Laminate, Sound proofing, Wall panels

Project Waterman
Architects: Fathom Architects
Interior Designer: Fettle Design
Photographer: Aaron Smith
Product: Original Shell

"We are Floor Gallery, *and CORK is what we BELIEVE in."*

Beautiful Floors, Better Future

It’s time to shape a better future, one step at a time. By working together, we can make a meaningful contribution to more sustainable and environmentally considered interiors.

The cork used in our flooring is carefully harvested without cutting down the tree. Only the outer bark is removed using traditional methods, allowing the cork oak to regenerate naturally and continue growing for generations.

Our carbon-negative cork floors contribute to a greener, healthier built environment for generations to come. Join us in building a better future from the ground up.
