BREATH OF FRESH AIR
ENGINEERED TIMBER FLOORING

Introducing the Breath of Fresh Air (BOFA)
Collection by The Floor Gallery and Oslek Coatings

BOLD COLOUR CALM AIR

Navigating situationships is exhausting. So is choosing between beige and brown. This collection is your palate cleanser - timber flooring in colours as bold as your worst dating stories. Finished with Oslek's VOC-free LED Hardwax Oil so the only thing lingering in the air is, well, air.

BOUDOGEOTOUR

We all have stories to tell and places to be.
Here is a collection of colours to reminisce
summer in our 20s.

6FT BLUE

The one who said he was 6ft on the app and actually is. This one commands quiet confidence. We like.

BLUE CHIP

Stable like a blue chip stock. Low volatility, good returns - maybe you should have stuck with him...

BLUE EYED BLUE

The golden boy who knew exactly what his eyes
did to you.

ΔPEROL ORANGE

She's bright, playful but just enough bitter
enough to make her moreish. Gone by
September but it was worth it anyways.

PEAR TREE GREEN

Whether you want an Aperol, avocado on toast
or, a cute runner, this is the cafe to be seen.

CHERRY RIPE RED

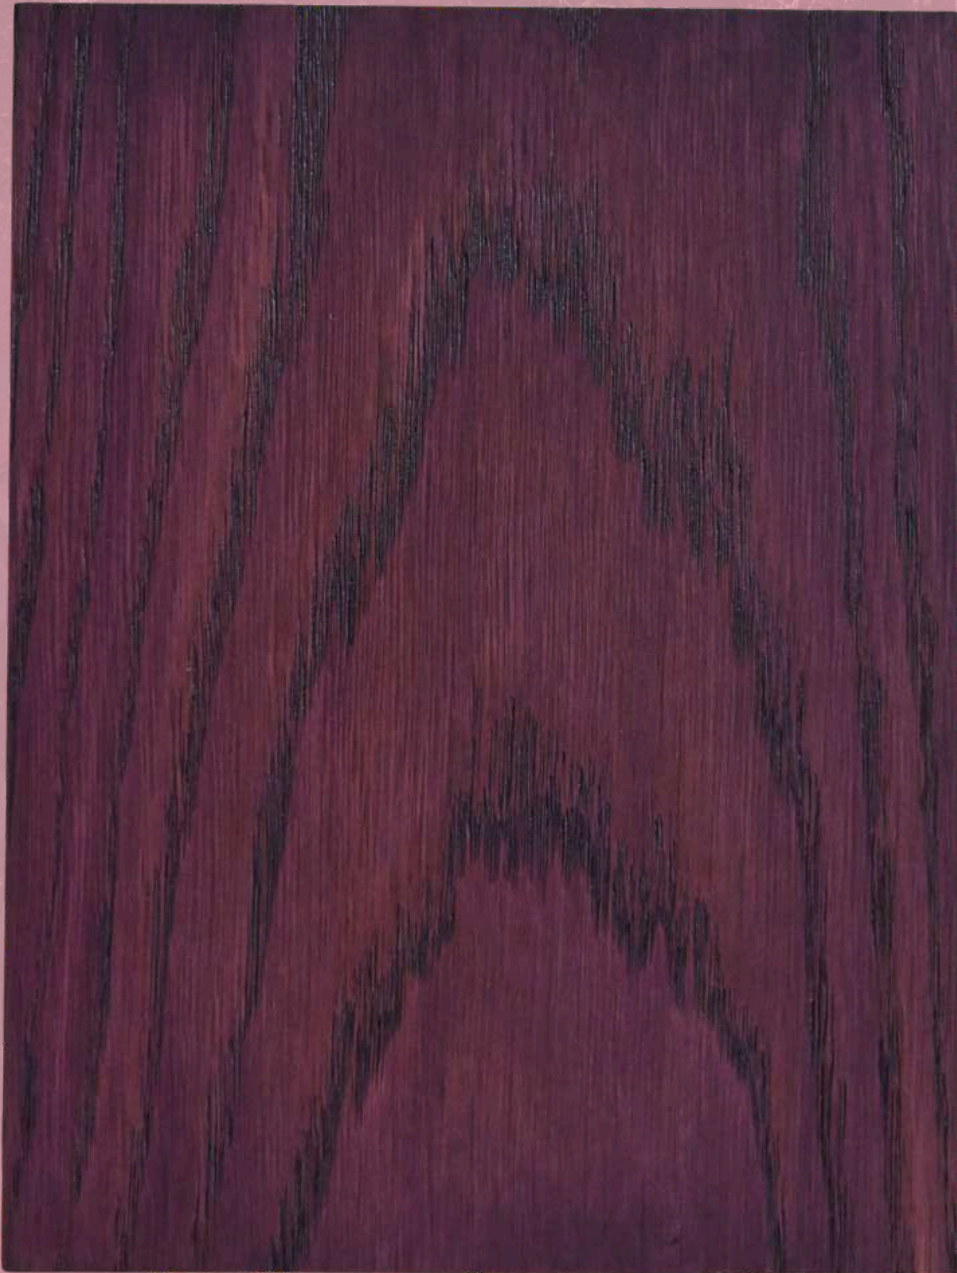

Sweet at first but you're unsure on the second date. Does this one really belong in the Favourites box?

PEAT GREEN

Is it Peat Green or Pete Green? Either way, this one is grounded, low-maintenance and calm. The weather is cooling down so perhaps Pete is exactly what we need.

SMOKE BUSH PURPLE

She's a home body. Moody, wine-dark and autumnal, even in the peak of summer.

SWATCHES

PEAT GREEN

CLEANER

A date can be look great. But it's what's on the inside that counts.

Same goes for your floor. Because this one lasts much longer than a summer fling.

THE STRUCTURE

Timber floors are a lifetime partner. That is why we believe in a honest, robust construction and, unmasked natural beauty. Don't just take a floor for its face value.

We believe in a strong multilayered plywood core, cross laminated for ultimate stability. A thick veneer is a must: 3-6mm of solid oak, walnut or ash. And finally, a healthy lick of VOC-free, penetrative oil to ensure the natural beauty of timber is celebrated, not masked. Below is what the real deal looks like (and the catfish for comparison).

THE FORMATS

This collection features three styles of timber flooring that have stood the test of time – Plank, Herringbone and Chevron.

Will it be the straightforwardness of a straight board or, the romance of parquetry?

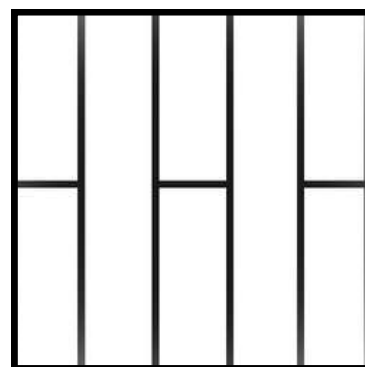

Either way, any of our colours can be applied to the following:

Plank

Thickness: 11-19 mm

Width: 90 /120 /140 /180 /220 /250 mm

Length: Random Lengths 500 – 2400 mm

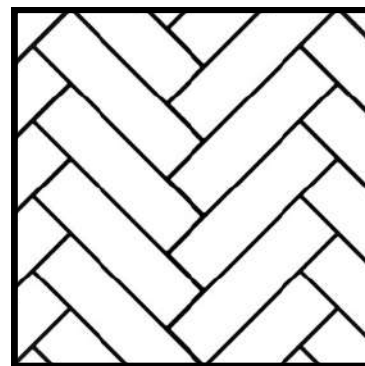

Herringbone

Thickness: 11-19 mm

Width: 90 / 120 /140 mm

Length: Standard 600 mm

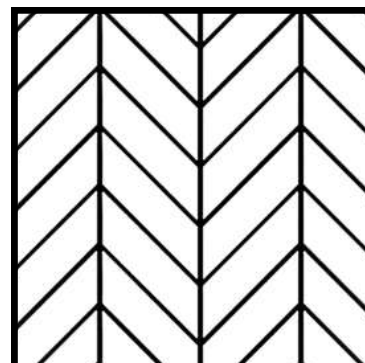

Chevron

Thickness: 11-19 mm

Width: 90 / 120 /140 mm

Length: Standard 600 mm

Angle: 30°&45°

THE GRADE

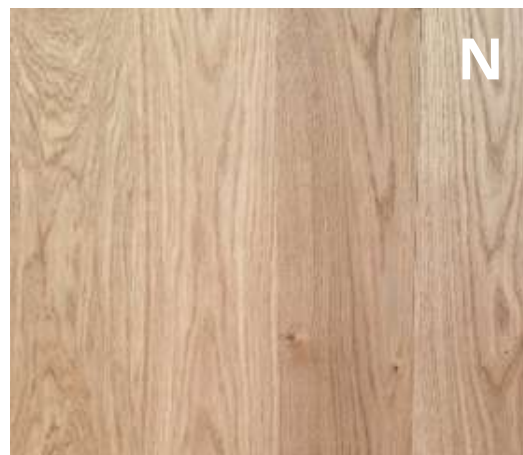

RUSTIC

Rustic allows up to 5 healthy and unhealthy knots per linear meter, with a maximum size of 30mm. It permits filled splits and cracks up to 150mm x 3mm and includes allowances for silver grain/wood rays and mineral streaks up to 150mm in length. Bark pockets and holes/voids are not allowed.

NATURE

Nature grade permits up to 3 healthy knots per linear meter (max 15mm) and 2 filled unhealthy knots per linear meter (max 15mm). Holes, voids, splits, cracks, and bark pockets are not allowed. It includes silver grain/wood rays and mineral streaks up to 50mm in length, with no pronounced appearance.

SELECT

Select grade allows up to 2 healthy knots per linear meter with a maximum size of 3mm. Unhealthy knots, holes, voids, splits, cracks, bark pockets, and mineral streaks are not allowed. It does allow silver grain/wood rays and heartwood.

THE FINISH

To give your spaces a Breath of Fresh Air, we choose to finish our floors with Oslek's breathable, penetrative LED Hardwax Oil.

Breathable because its Indoor Air Comfort Gold (as clean as you can get).

Penetrative because we are strongly against putting a 'plastic-film' of lacquer on one of earth's most beautiful materials - timber.

WHY ZERO VOC MATTERS

The BOFA Collection hopes to bring your project a Breathe of Fresh Air. And we mean it quite literally.

Oslek LED Hardwax Oil

0% VOC

Cures instantly under LED light. No off-gassing period — the space is safe to occupy the moment the floor is installed.

Green Flag

Traditional solvent-based finish

High VOC

Off-gasses into the room for up to weeks after installation. Common cause of "new floor smell" and headaches in new spaces.

Red Flag

DID YOU KNOW?

That a traditional lacquered timber floor can off-gas Volatile Organic Compounds (VOCs) for up to 6 months after installation?

Not ours.

PRODUCT INFORMATION

FINISH

Product Type	LED Hardwax Oil
Sheen	Matt
Cure Method	Instant cure via LED light (photo-polymerisation)
Colour Range	Full BOFA Collection colour bank

PERFORMANCE

VOC Emission	VOC-free
Water & Stain Resistance	Resistant to both
Energy Use (Curing)	50–70% less than traditional UV-curing systems for UV lacquer and UV oil
Formaldehyde Emissions	EN 717-1 / E1

SUSTAINABILITY

Indoor Air Comfort	Gold
VOC French Regulation	
Emicode	EC1 Plus

APPLICATION & CARE

Suitable Formats	Plank, Herringbone, Chevron
Maintenance	On-site repair and refinishing, due to instant-drying properties
Origin	European-made flooring, Australian-made hardwax oil

The BOFA Collection offers superior quality with 100% natural origins, blending timeless aesthetics and contemporary functionality.

It comes with a 25-year warranty. BOFA plank flooring can be fully bonded or floated, making it suitable for underfloor heating as well as domestic and commercial installations.

The flooring is FSC-certified and meets standards for fire behaviour (EN 13501/Cfl-s1), formaldehyde emissions (EN 717-1/E1), and noise reduction (DIN EN ISO 10140-3).

By sourcing oak directly from Europe and drying the raw materials at our mill in Hungary before shipping to Portugal, we ensure that our flooring is FSC-certified when required. Our lamellas, crafted in Portugal, are combined with premium European plywood and manufactured using top-tier European machinery, enabling us to uphold the highest quality standards.

We use polyurethane adhesive, rather than PVA, to ensure that our products are suitable for underfloor heating in commercial and residential settings. This ensures that our floors combine the beauty and benefits of nature with the best innovations of man to create timeless aesthetics and contemporary functionality.
